Central Freight Lines XML Shipment Tracking Web Service

The web service description is available at
http://www.centralfreight.com/CFLServices/TrackShipment.asmx
The only argument for this service is a Central Freight Lines PRO, BOL, or PO number.
You may click here to test for a PRO#:
http://www.centralfreight.com/CFLServices/TrackShipment.asmx?op=FreightBillRequest

You may also pass in the key information as a query parameters in the url:
http://www.centralfreight.com/CFLServices/TrackShipment.asmx/FreightBillRequest?FreightBillNumber=605421288

Image Retrieval

We do not have an actual web service available, per se. It can be achieved, however, with a valid
Central Freight Lines PRO numbers and a couple of HTTP GET requests.

GET -- pronumber

   (1) http://imaging.centralfreight.com/tyco/query.asp?proNumber=561867318

This will return XML. From that, you can parse out the following:

(2) Retrieve ImageID(s) attributes to retrieve list.

(3) Within ImageID elements there are FieldValue elements.

(4) Look for attributes FieldName with values of "custDOC_TYPE"

(5) FieldValue has "DR" (proof of delivery) or "BL" (bill of lading)

(6) For each "ImageID" that you find and/or need, issue HTTP GET:

http://imaging.centralfreight.com/tyco/view.asp?imageid=95514344
http://imaging.centralfreight.com/tyco/view.asp?imageid=95514318
http://imaging.centralfreight.com/tyco/view.asp?imageid=95514331

The image stream returned is in TIF format.
